EDUCATION

University School of Information, Communication & Technology (USICT) <i>Bachelor of Technology (B.Tech) in Information Technology</i>	New Delhi, India CGPA: 9.1/10 Aug. 2024 – Present
---	---

TECHNICAL SKILLS

Programming Languages: C++, JavaScript
Frontend: React.js, Next.js, HTML5, CSS3, Tailwind CSS
Backend: Node.js, Express.js
Databases: MongoDB, PostgreSQL
ORM: Prisma
Authentication: Clerk, NextAuth.js
Developer Tools: Git, GitHub, VS Code, Postman
Frameworks & Technologies: Redux Toolkit, TanStack Query, Cloudinary, Framer Motion, Razorpay, REST APIs, Google Gemini API, OpenAI API
Core Concepts: Data Structures & Algorithms, Object-Oriented Programming (OOP), DBMS, Operating Systems

PROJECTS

AI Career Copilot | *Next.js, React.js, PostgreSQL, Prisma, Clerk, Google Gemini API, OpenAI API, Tailwind CSS*
[GitHub](#) [Live Demo](#)

- Built a production-ready full-stack AI-powered career platform using Next.js, PostgreSQL, and Prisma, enabling users to analyze resumes, optimize ATS scores, and prepare for technical interviews.
- Integrated Gemini API for ATS-aware resume analysis by parsing uploaded PDF/DOCX resumes and generating personalized AI-driven improvement suggestions based on resume content and industry standards.
- Engineered AI-powered voice and video mock interview modules using OpenAI API and Grok AI, delivering role-specific interview questions with AI-generated performance feedback.
- Implemented secure authentication with Clerk, protected routes, responsive dashboards, resume upload and parsing workflows, and REST APIs to deliver a seamless end-to-end user experience.

NextCommerce | *Next.js, React.js, Node.js, MongoDB, Redux Toolkit, Tailwind CSS, Cloudinary, Razorpay*
[GitHub](#) [Live Demo](#)

- Built a production-ready full-stack e-commerce platform using Next.js, Node.js, and MongoDB, implementing authentication, product management, shopping cart, and complete order processing workflows.
- Built responsive shopping experiences featuring product search, filtering, product variants, shopping cart, checkout workflows, and optimized React.js components with Tailwind CSS.
- Integrated Razorpay payment gateway and Cloudinary media management to enable secure online transactions and scalable product image handling through REST APIs.
- Implemented Redux Toolkit for global state management, protected user/admin routes, and an admin dashboard to efficiently manage products, orders, users, and inventory.

ACHIEVEMENTS

- Solved **300+ Data Structures & Algorithms** problems across **LeetCode (180+)** and **GeeksforGeeks (120+)**, demonstrating consistent problem-solving practice and strengthening algorithmic thinking for software engineering interviews.
- Recognized as a **Finalist in HackVriksh Hackathon**, collaborating with a team to design, develop, and present an innovative software solution under competitive hackathon timelines.
- Earned the **Locked In Hackathon Participation Certificate** for actively contributing to collaborative software development and rapid solution prototyping.
- Participated in the **Smart India Hackathon (Internal Round)**, collaborating with a team to develop and present an innovative solution to a real-world problem.
